Program Characteristics:

Executive Summary

Corrections Health services at the Detention Center (MCDC) for the 4th floor provide 24-hour evaluation and treatment of emergency and serious medical, dental, and mental health care needs for the most seriously ill clients in the system and for clients in disciplinary housing who require special observation.

Program Description

Corrections Health staff is on site 24 hours a day, 7 days a week for emergency response, evaluation and treatment, suicide prevention, isolation of patients with communicable diseases, stabilization of chronic disease conditions, medication management, high risk pregnancy, and drug and alcohol withdrawal. Nurses evaluate, treat, and educate clients. Mental health staff responds to crisis situations, conducts mental health evaluations, and makes plans for release. Infirmary care in the jail keeps clients out of the hospital and supports public safety and cost-effective care. Clinical services for 208 clients on the 4th floor at MCDC include medical and dental exam rooms, medication room, x-ray, lab, orthopedic and other diagnostic and treatment supplies. The clinic provides on-site medical, dental, and mental health services for approximately 5,400 clients annually.

Infrastructure for health care at MCDC includes program-wide administration and day-to-day supervision to assure quality of care, as well as physicians, dental staff, pharmacy staff, nursing staff, medical records, and clinic and office support services which are required for full care delivery.

Program Justification

Corrections Health works with the Health Department, Sheriff's Office, Corrections counselors, chaplains, courts, families, and outside care agencies to identify and stabilize health needs of clients. As illnesses are stabilized through intervention from medical, dental, and mental health staff, the clients are able to actively participate in educational programs and in their own legal proceedings, which helps decrease recidivism. Medical staff interfaces with all public safety entities along the continuum of incarceration. Identification of communicable diseases provides a safe environment for everyone working or living in the jail. Providing on-site health care helps protect the outside community by identifying and treating the dangerously mentally ill and those diagnosed with communicable diseases. In addition, stabilizing serious health conditions reduces high cost hospital care.

Deaths and adverse health outcomes in jail result in lawsuits against the county. Corrections Health community-based, accredited health care reduces financial risk to the county.

Performance Measures

Measure Type	Primary Measure	Previous Year Actual (FY04-05)	Current Year Purchased (FY05-06)	Current Year Estimate (FY05-06)	Next Year Offer (FY06-07)
Output	Number of requests for health care evaluated by a nurse per month	198	214	214	263
Outcome	Number of clinic visits for medical, dental, and mental health care per month	122	127	127	156
Quality	Number of clients sent to the hospital by ambulance each year	10	14	14	18
Efficiency	Average number of clients each nurse cares for per shift	156	156	156	208

Performance Measure - Description

On-site clinical services are less costly than care in a doctor's office out of the jail. Up-to-date on-site clinics with diagnostic, x-ray, lab, and treatment equipment decrease costs and increases health outcomes.
(see more under significant changes)

Legal/Contractual Obligation

The right to health care in jail is legally mandated under Federal and State law. When an individual is arrested and incarcerated, the obligation for health care falls upon the government as a matter of constitutional law, enforceable under the U.S. Constitution's 8th Amendment and the 14th Amendment's due process clause. Failure to provide health care amounts to deliberate indifference to serious medical needs. State laws (ORS 169.076) further delineate standards for local correctional facilities.

Revenue/Expense Detail

Program Revenue for Admin	\$0	\$0	\$0	\$10,274
Total Revenue:	\$95,000	\$0	\$36,800	\$10,274

Explanation of Revenues

Clients are charged a co-pay fee for the health care they receive in jail and they are billed for any health care received out of jail while still in custody. Health care cannot be denied for inability to pay.

Significant Program Changes

Last year this program was: #40034, Corrections Health-Detention Center

No changes from FY05-06.

(Cont from Performance Measure Description)

Preventing emergencies is the goal of quality care. Having professional, licensed medical staff evaluating clients ensures proper treatment of illness.

Nurse to client ratio is based on multiple factors including physical plant, classification, length of stay, and type of housing (i.e., infirmary, male or female, disciplinary, general).
