Executive Summary

This program offer accounts for the statutory responsibility the County has to distribute revenues received from the sale of timber cut on federal forest lands. These revenues are dedicated to a County School Fund and distributed proportionally to local school districts.

Program Description

Since 1908, all counties in Oregon have received payments from the US government from revenue generated by the sale of timber cut on federal forest lands. This mandated program provides approximately \$200-\$225,000 annually to local school districts in Multnomah County. State law specifies how the revenue is to be allocated.

Program Justification

This program links to the School Success priority. It provides direct cash assistance to school districts. While this is not a large source of revenue in Multnomah County, the link between timber revenue and schools has been established since the early 1900's. Federal legislation was enacted (PL 106-393) in 2001 that established a "safety net" for counties that have historically been heavily reliant on timber revenue. This safety net guarantees that counties will receive a specified level of funding each year based on average receipts prior to implementation of the Clinton administration's forest plan. Without these safety net payments, many school districts in Oregon would be much more heavily reliant on state and local revenue sources.
