Executive Summary

The Facility Security Unit (FSU) is the first visible public safety system and the first line of emergency preparedness in county facilities. Staff prevent public disturbances and stop the introduction of weapons and narcotics into jail facilities. Through contracts, they also provide security at two public libraries.

Program Description

The FSU provides external and internal security to the Detection Center, Inverness jail, the Central Library, and the Midland library. Responsibilities include electronic scanning and patrols. They create a safe environment for citizens and staff through assessment of persons and properties entering jail facilities and libraries. Staff act as a public referral system to social service programs. They collaborate with multiple law enforcement agencies regarding criminal justice information. They provide various inmate services such as bails, visitations, clothing, etc.

Program Justification

The FSU is the first level of response to disturbances and emergencies inside county facilities. They insure a safe environment for the visiting community. Staff provide information and referral services to the public regarding mental health and civil processes. Many citizens entering public facilities are emotionally distraught or frustrated and the FSU is the single point of contact to refer these citizens to the appropriate service provider. This ability is coupled with knowledge of both law enforcement and civil process procedures, providing greater stability for our court system and the public they served.
