**Executive Summary**

Electronic Monitoring (EM) allows staff to monitor the activities of pre- and post-adjudicated individuals in the community through house arrest, curfew monitoring, alcohol consumption monitoring or the monitoring of an offender's movement in the community. Utilizing EM and Global Positioning Software (GPS) technology to minimize the movements of offenders within the community has proven to be a reliable, cost-effective way to sanction offenders and reinforce public safety. Current data indicates that most defendants and offenders on EM complete their obligation successfully. On average, 66 individuals are supervised per day on EM, which translates to over 20,000 expensive jail bed days saved annually.

**Program Description**

EM enables the county to utilize a restriction other than jail during pre-adjudication and post-conviction. EM allows Probation and Parole Officers (PPO) to know where high risk offenders are located at any given time. This alternative sanction expands supervision sentencing options for judges and creates cost-effective offender management by having the offender pay a portion of the equipment costs (as determined by a fee scale). This sanction further allows the offender the ability to maintain employment and continued participation in treatment groups.

The EM program is a collaborative, systems-oriented project that works closely with PPOs who in turn work with the Courts, the Oregon Board of Parole and the District Attorney's Office to enhance the success of individuals placed on EM.
