Executive Summary

Rockwood Health Center provides comprehensive primary care and behavioral health services to the diverse, poor, underserved residents in the East County Rockwood area. The Rockwood clinic was strategically placed to provide culturally competent care to a population that otherwise may not have access to medical care.

Program Description

Rockwood Health Center primary care services are designed to be a patient centered medical home. This includes reducing barriers to access, integration of behavioral health services, providing continuity and coordination of services and collaboration with community partners. Culturally competent primary care services are provided which include, treatment of acute and chronic illnesses, behavioral health, family planning, prenatal and preventive services (well child, immunizations). Ancillary support services are operationally integrated and include pharmacy and lab. Enabling services include Medicaid eligibility screening, medical interpretation, transportation, case management and health education. Rockwood Health Center plays a significant role in providing safety net medical services to residents in the community. Forty percent of the over 40,000 residents earn less than 200% of the federal poverty level and 20-30% are uninsured. From 2000 to 2007, the number of persons of color in Rockwood increased by 54% (the countywide increase was 27%). Furthermore, 62% of the 7,000 plus Rockwood residents living below 100% of the federal poverty level are persons of color (which is 20% higher than the countywide average) and five of the area's eight census tracts are designated as medically underserved populations in recognition of access issues residents faced.
