### Executive Summary

This program case manages approximately 3,000 Medicaid recipients who have been determined to have a developmental disability out of the 4,200 total caseload of developmentally disabled consumers. Of the adult consumers, approximately 1,935 are actively enrolled in a funded residential and/or vocational program under the Home and Community Based Waiver. The primary responsibility is to monitor 317 residential, adult foster care, supported living and vocational service sites to assure that providers are in compliance with the Oregon Administrative Rules and also to assure the health and safety of the program consumers.

### Program Description

Case Management services for adults with developmental disabilities are person-centered with the goal of linking clients with services and resources in their neighborhoods. In addition, staff assists clients in applying for financial and housing benefits. Monitoring customer health and safety is our primary responsibility. Case Management assists customers by involving family, friends and community partners in their lives in order to promote an enriched quality of life by developing skills, confidence, self-worth and independence in order to assist adults with developmental disabilities in the areas of self-care, behavior and resource coordination. This program partners with state and local organizations that have mutual interest in our clients, such as community justice, mental health and the Department of Vocational Rehabilitation. Through program interventions to avert crisis situations and monitoring of customer and provider health and safety concerns, instances of abuse are more likely to be detected and investigated assuring the customer to continue to live more independently. The importance of monitoring will continue to increase as funding reductions are made to programs serving adults.
