Program Characteristics: Measure 5 Education

Executive Summary

The Adolescent Health Program implements community and school-based parent and youth education and teacher training designed to address key health disparities among adolescents that include: teen pregnancy, educational attainment, sexually transmitted infections, and other health concerns.

Program Description

The overall teen pregnancy rate in Multnomah County is higher than the state's rate. Significant disparities exist among Latinas, American Indians, and African Americans when compared to the County as a whole. A recent study of drop out rates in Oregon showed that Multnomah County high schools have the worst graduation rate in the state with dropout rates ranging from 43% to 47%. Teen pregnancy is a factor contributing to dropout rates. Furthermore, STD rates are highest among teens of any age range, and significant disparities exist within this subset as well for African Americans, Latinos, and gay youth.

This program works to reduce teen pregnancy, delay the onset of sexual activity, and strengthen healthy relationship and sexuality skills of adolescents. All program components stress prevention and use culturally specific, evidence based, population focused approaches. Youth education and skill building: Health Educators teach high school and middle school youth directly, using evidence-based culturally specific or general education approaches as appropriate. Sites include public and alternative high schools, SUN programs, public housing units, congregations, and other community sites. Community Services: Based on the theoretical framework of positive youth development, best practice models provide educational sessions that increase skills and knowledge of parents and other supportive adults to communicate with youth about sexual health, relationship skills, and decision making. Teacher Training: Due to ongoing budget deficits, Multnomah County middle schools have eliminated many health teachers and reassigned health education to other areas. The program will support school districts in providing evidence-based comprehensive sexuality education through technical assistance and capacity building effort for teachers, including co-teaching, training, and coaching, as well as curriculum support. Efforts are focused on highest areas of need demographically/geographically based on current local epidemiology.

Performance Measures

Measure Type	Primary Measure	Previous Year Actual (FY10-11)	Current Year Purchased (FY11-12)	Current Year Estimate (FY11-12)	Next Year Offer (FY12-13)
Output	Number of participants in educational sessions/training	0	1,200	4,094	3,750
Outcome	Percent of participants demonstrating increased knowledge	0	80	85	80
Quality	% of participants utilizing skills to increase parent to youth communication	0	80	80	80

Performance Measure - Description

1) Since the beginning of FY12, two grants have been secured, increasing the FTE available and the # of participants to be served. Current year estimate and next year offer reflect the change in capacity. 2) The percentage of program participants that demonstrate increased knowledge about youth sexual health, relationship skills, and decision making skills. 3) The percentage of parent program participants that feel confident they can implement new or improved skills to communicate effectively with their youth.
