Program Characteristics: In Target

Executive Summary

Outpatient treatment is an essential part of the alcohol and drug treatment continuum that impacts public safety. At any time, 130 offenders attend these community-based, outpatient treatment programs one to three times per week. Nearly 90% of the participants are classified as high risk and are statistically more likely to commit a new crime if intervention measures are not implemented. The remaining ten percent of participants are referred for treatment from our Medium Risk Unit.

Program Description

Services are provided through contracts with nine non-profit providers who are dually licensed to provide drug and alcohol treatment and mental health services. Outpatient treatment is an option for qualified offenders. Currently contracted treatment programs are equipped to respond to culturally-specific needs, provide comprehensive mental health counseling, assist with job related issues and support housing transitions. All contracted treatment programs use research-based approaches which are geared towards motivating offenders to learn new skills that support a lifestyle free of crime and addiction.

Without treatment, offenders are more likely to reoffend and/or end up occupying expensive jail beds. A study published by the Oregon Legislature Public Safety Strategies Task Force (2008) found that drug treatment programs in the community have been shown to reduce criminal re-offense rates by 9%.

Performance Measures

Measure Type	Primary Measure	Previous Year Actual (FY10-11)	Current Year Purchased (FY11-12)	Current Year Estimate (FY11-12)	Next Year Offer (FY12-13)
Output	Number of offenders served	866	600	1,022	600
Outcome	Percent of offenders who do not recidivate one year post treatment exit	0.0%	0.0%	88.0%	88.0%

Performance Measure - Description

✓ **Measure Changed**

Recidivism is a measure of new felony convictions one year post treatment using a recidivism rate.
