Executive Summary

This program case manages approximately 1,300 children (birth to 17) who have been determined to have a developmental disability out of the 4,950 total caseload of developmentally disabled consumers. The majority of the children served live in their family homes. Services for these children include referrals to community resources, family to family support groups, assistance with school programs and training opportunities for families. These services allow children with serious disabilities to remain in their family homes to prevent placement in child foster care and residential sites.

Program Description

Services for children are child-centered and family focused, providing assistance required to maintain the child in the family home. Funding for services to children is only 10.5% of all service funds, including those managed here and paid through the state. Child-centered planning and supports help to identify the customer's interests, focus on strengths, promote independence and self-worth, and map out family, friends and community members as potential resources. As a child approaches 18 planning is done to transition the customer to adult services. The program partners with state and local organizations that have mutual interest in our clients. This partnership strengthens families and helps to reduce the higher costs of out-of-home crisis placements or permanent placement in institutions.
