Executive Summary

The Early Assessment and Support Alliance (EASA) is an early psychosis intervention program addressing the needs of young persons aged 15-25 who demonstrate initial symptoms of psychosis, with the goal of managing long-term problems and consequences. EASA offers formal psychiatric treatment services as well as vocational and educational support, and involves the young person's family in treatment. The program will provide services for approximately 88 clients.

Program Description

The EASA team identifies young people experiencing the first episodes of psychosis and offers them a broad array of individualized treatment avenues and community-based care. Services include assessment, treatment planning, case management, medication management, psycho-educational workshops, multi-family groups, occupational assessments and interventions, and assistance with accessing supported employment and educational opportunities. These services are provided by a multidisciplinary team that includes a psychiatrist, a nurse, a vocational and occupational therapist and mental health consultants. The team's composition and activities are designed to meet the standards of a defined evidence-based practice model as required by the state. Research suggests that the median age for the onset of initial episodes of psychosis is under the age of 25. Research also suggests that early intervention and immediate access to treatment can directly reduce hospitalization rates and the incidence of psychosis' long-term disabling consequences.

Performance Measures

Measure Type	Primary Measure	Previous Year Actual (FY11-12)	Current Year Purchased (FY12-13)	Current Year Estimate (FY12-13)	Next Year Offer (FY13-14)
Output	Total individuals enrolled in program receiving ongoing services ¹	90	82	88	88
Outcome	% reduction in hospitalization rate 3 months pre and 6 months post enrollment	61.0%	87.0%	61.0%	60.0%

Performance Measure - Description

¹ This measure compares the hospitalization rate for the 3 months prior to services with the rate for the 6 months post EASA service enrollment which is an indication of the stabilization of the individual.
