Executive Summary

This program offer will build on a regional vulnerable populations emergency planning framework to integrate the needs of populations with physical, sensory, mental health, cognitive or developmental conditions into the County's disaster planning.

The project funded by this offer will tie vulnerable population needs into the County Emergency Operations Plan, and include building mapped information into Emergency Management's web-based mapping tool used for planning and response coordination.

Program Description

A Regional Vulnerable Populations Emergency Annex was developed in 2010 to assist counties in our region in understanding the functional needs of individuals in an emergency. This document provides a framework for integrating vulnerable populations into the County's disaster planning. These individuals can be challenged by rapid onset events, isolating events, power failure or large-scale and prolonged events. Issues such as appropriate alert and notification, transportation, evacuation, shelter requirements, durable medical needs and behavioral health issues in shelter populations will be addressed by this offer.

Using the framework document and subsequent analysis based on RAND Institute and National Council on Disability reports, this offer will fund a project to build vulnerable population needs into the current County Emergency Operations Plan (EOP). The project will work with departments including Department of County Human Services and Health as well as community stakeholders to integrate departmental planning with the EOP.

Additionally the project will work with IT/GIS to facilitate the use of geo-coded information including demographics, service sites, and transportation routes into planning and response tools. Requirements for a vulnerable populations registry that would more readily integrate with alert and notification systems and 911 call/data system will be identified.
